

medilab/seattle

Greetings!

We'd like to thank you for your interest in the Audio Training Program at MediaLab/Seattle. As you are probably aware, Digidesign's Pro Tools is the industry standard platform for digital audio production, and MediaLab is proud to offer workshops and training methods to help you get the most out of your recording experience. The unique part of our program: classes are taught in a professional studio environment by award-winning producers and engineers. We want you to be more than just another engineer or Pro Tools operator, we want to help you on your way to becoming a professional Media Producer. We see a broad based education in media production as the key to a successful future in content creation. So, let's get started!

Attached are the necessary documents to get you enrolled in the Pro Tools and other Audio Training Programs at MediaLab. Classes are offered on a regular basis (check our website for the current schedule – www.MediaLabSeattle.com), and we're always happy to answer any questions you might have.

Our Apple lab features iMac workstations with the Intel Dual Core 2 processor. Each workstation is equipped with an MBox 2 Mini interface and Pro Tools 8. Everything you need to take your Pro Tools experience to the next level.

Once again, thank you for taking the time to find out more about MediaLab, we look forward to being part of your creative future.

Sincerely,

Glenn Lorbecki
President
